

## Dune (Romansh Edition)

Cel mai important roman SF din toate timpurile. Este convingator, puternic, genial. - Robert A. Heinlein; Un unicat in literatura science fiction Nu se compara cu nimic, poate numai cu Stapanul inelelor. - Arthur C. Clarke; In strafundul inconstientului sau, omul are intiparita nevoia de a descifra universul in termenii logicii. Numai ca universul real este intotdeauna cu un pas inaintea logicii. - Frank Herbert; Triumf suprem al imaginatiei, actiunea romanului cu care se deschide seria Dune, vanduta in milioane de exemplare in lumea intrega, se desfasoara pe planeta Arrakis, unde Paul Atreides se va transforma in misteriosul MuadDib. Eroul se va razbuna pe cei care i-au tradat familia si va implini cel mai vechi si cel mai arzator vis al omenirii. Combinatie uimitoare de aventura, spirit mistic si forta vizionara, prima carte din cea mai importanta serie din literatura SF este o lectura obligatorie pentru cititorii de toate varstele.
