

Legends of Charlemagne of Romance of the Middle Ages (Classic Reprint)

Collage PM tfoi PREFACE. BESIDES the education which schools and colleges impart, there is still another kind necessary to completeness. It is that which has for its object a knowledge of polite literature. In the intercourse of polished society a young person will more frequently need an acquaintance with the creations of fancy than with the discoveries of science or the speculations of philosophy. In an age when intellectual darkness enveloped Western Europe, a constellation of brilliant writers arose in Italy. Of these, Pulci (born in 1431), Boiardo (1434), and Ariosto (1474) took for their subjects the romantic fables which had for many ages been transmitted in the lays of bards and the legends of monkish chroniclers. These fables they arranged in order, adorned with the embellishments of fancy, amplified from their own invention, and stamped with immortality. It may safely be asserted that as long as civilization shall endure these productions will retain their place among the most cherished creations of human genius.
