

The Plague

The Plague (French: La Peste) is a novel by Albert Camus, published in 1947, that tells the story of medical workers finding solidarity in their labour as the Algerian city of Oran is swept by a plague. It asks a number of questions relating to the nature of destiny and the human condition. The characters in the book, ranging from doctors to vacationers to fugitives, all help to show the effects the plague has on a populace. The novel is believed to be based on the cholera epidemic that killed a large percentage of Orans population in 1849 following French colonization, but the novel is placed in the 1940s. An existential classic.
