

The Eternal Husband (The Art of the Novella)

The most monstrous monster is the monster with noble feelings. This remarkably edgy and suspenseful tale shows that, despite being better known for his voluminous and sprawling novels, Fyodor Dostoevsky was a master of the more tightly-focused form of the novella. *The Eternal Husband* may, in fact, constitute his most classically-shaped composition, with his most devilish plot: a man answers a late-night knock on the door to find himself in a tense and puzzling confrontation with the husband of a former lover but it isn't clear if the husband knows about the affair. What follows is one of the most beautiful and piercing considerations ever written about the dualities of love: a dazzling psychological duel between the two men over knowledge they may or may not share, bringing them both to a shattering conclusion. *The Art of The Novella Series* Too short to be a novel, too long to be a short story, the novella is generally unrecognized by academics and publishers. Nonetheless, it is a form beloved and practiced by literatures greatest writers. In the *Art Of The Novella* series, Melville House celebrates this renegade art form and its practitioners with titles that are, in many instances, presented in book form for the first time.
