

Wind Raven (Agents of the Crown Book 3)

A salty, sweeping, evocative tale of romance on the high seas--and a good old-fashioned love story that will keep you up far, far past your bedtime. A British privateer and an American hoyden clash on the high seas as they tangle with a notorious pirate...and attempt to resist the rising tide of passion between them. A PERILOUS PASSAGE Ordered by the Prince Regent into the Caribbean, English sea captain and former privateer Jean Nicholas Powell has no time for women aboard the Wind Raven, especially not Tara McConnell. The impudent American demanded passage, and so she'll get more than she bargained for: Instead of a direct sail to Baltimore, she'll join his quest to investigate and neutralize the rampaging pirate Roberto Cofresi. But the hoyden thinks she can crew with his men! And though Nick bans her from the rigging he is captivated watching her lithe, luscious movements on deck. Facing high seas, storms, cutthroats and the endless unknown, he must always protect his ship, his passengers, his crew. But on this voyage, with this woman, there is a greater danger: to his heart. A salty, sweeping, evocative tale of romance on the high seas--and a good old-fashioned love story that will keep you up far, far past your bedtime. So, reach for the coffee. Brava for Regan Walker!--Danelle Harmon, New York Times & USA Today Bestselling Author
